

ANELE LUKHELE

Durban, South Africa | 076 920 7884 | anelezamokuhlelukhele@gmail.com | github.com/Anele47

PROFESSIONAL SUMMARY

Motivated and detail-oriented final-year Bachelor of Information and Communication Technology student at Durban University of Technology. Skilled in front-end web development, object-oriented programming, and database management, with a strong foundation in algorithms, data structures, and software engineering principles. Adept at building responsive, user-friendly applications and committed to delivering clean, efficient code in collaborative team environments.

EDUCATION

Bachelor of Information and Communication Technology

2024 – Present

Durban University of Technology | Durban, South Africa

Relevant Coursework:

- Object-Oriented Programming & Algorithms and Data Structures
- Database Systems Management & Backend Development
- Software Engineering & Machine Learning Fundamentals
- Web Application Development & Systems Analysis

TECHNICAL SKILLS

Programming Languages: Python, Java, C#, JavaScript

Web Development: HTML5, CSS3, JavaScript (ES6+)

Database Management: SQL, Database Design, Query Optimisation

Data Analysis & Visualisation: Python (Pandas, Matplotlib), Microsoft Excel

Development Concepts: Object-Oriented Programming (OOP), REST APIs, Version Control (Git), Agile Methodologies

Operating Systems: Windows, Linux (basic)

PROJECTS & ACADEMIC WORK

Book Haven — Online Bookstore Platform

2025

Python | Flask | SQL | Web Development

- Developed a full-stack web-based bookstore system designed to modernise academic resource acquisition for students and staff at Durban University of Technology (DUT).
- Built backend functionality using Python (Flask, config.py, run.py).
- Replaced outdated manual procurement processes with a fully digital platform, improving accessibility and efficiency for end users.

DUT Peer Tutoring App — Android Mobile Application

2025

Java | Android (Kotlin/Gradle) | Mobile Development

- Designed and developed an Android mobile application to connect DUT students with peer tutors, facilitating academic support on campus.
- Built using Java and Gradle (Kotlin DSL), following standard Android project structure including app, gradle, and sample app java modules.
- Managed full project lifecycle from initial commit through to a functional mobile prototype.

Rendezvous Restaurant Management System

2024

SQL Server | C# | Backend Development

- Collaborated in a team to build a restaurant management system streamlining customer reservations and takeaway order processing for Rendezvous Restaurant.
- Designed and implemented a SQL Server database (SQL Server Express 2022) with multiple feature branches (7 branches, 27 commits), managing merge conflicts and version control.
- Delivered a seamless scheduling solution for both customers and staff, improving operational efficiency.

Learning Disability Detector — AI/ML Web App

2025

Python | Flask | SQLite | Machine Learning

- Co-developed a machine learning-powered web application to detect learning disabilities, applying Python-based ML libraries for classification and prediction.
- Built the full-stack solution using Flask (app.py), SQLAlchemy, and structured HTML templates, with static assets for a complete user interface.
- Implemented a user authentication system and database layer to securely manage student data and assessment results.

CERTIFICATIONS & ACHIEVEMENTS

- FNB App of the Year — Award recipient recognising outstanding mobile application development

PROFESSIONAL SKILLS

- Critical Thinking
- Teamwork & Collaboration
- Communication
- Time Management
- Adaptability
- Attention to Detail

LANGUAGES

- English (Fluent)
- isiZulu (Native)
